Summary

Data Analyst with hands-on experience in SQL, Python, Tableau, KPI development, and dashboard design. Delivered analytics projects involving business reporting, performance measurement, and large-scale data analysis on datasets exceeding 68M records. Skilled in transforming complex datasets into actionable insights that support data-driven decision-making. Pursuing a Bachelor's in Data Science and Applications from IIT Madras.

Education

Indian Institute of Technology Madras

2024 – Present

Bachelor's in Data Science and Applications | CGPA: 8.7/10

Relevant Coursework: Statistics, Database Management Systems, Machine Learning, Business Analytics

Skills

Languages & Querying: SQL (Joins, Window Functions, Aggregations, CTEs, Subqueries), Python (Pandas, NumPy, Matplotlib)

Databases: PostgreSQL, MySQL

Analytics & BI: Data Cleaning, Exploratory Data Analysis, KPI Development, Dashboard Design, Reporting Automation, Business Analytics

Visualization & Tools: Tableau, Power BI, Excel, Git, Jupyter Notebook

Projects

UIDAI Aadhaar System Stress & Risk Diagnostics

PostgreSQL, Tableau | GitHub

- Analyzed 68M+ enrollment and update transactions across three national datasets to identify operational bottlenecks and workload patterns
- Cleaned and standardized large-scale datasets to improve consistency and reliability for reporting
- Engineered district-level workload and risk KPIs using PostgreSQL aggregations and analytical queries
- Built Tableau dashboards highlighting regional stress indicators and operational trends for data-driven decision making

Findora – Campus Lost-and-Found Platform

Next.js, TypeScript, Supabase | Live

- Built and deployed a campus-wide lost-and-found platform for IITM students using Next.js and Supabase
- Designed workflows for item reporting, claim verification, moderation, and dispute handling
- Structured operational processes that reduced manual coordination during student events
- Managed deployment, database design, and continuous feature improvements based on user feedback

IITM Grade Suite – Academic Planning Tool

JavaScript, HTML, CSS | Live

- Built a grade-planning tool used by 1000+ IITM BS students
- Automated CGPA calculation, grade prediction, and target-score planning previously performed manually

Sales & Customer Dashboard

Tableau | GitHub

- Built an interactive dashboard tracking \$733K sales, \$93K profit, and 12.5K units sold
- Designed KPI reporting views, profitability analysis, and weekly performance tracking dashboards
- Implemented drill-down filters enabling self-service reporting across customer segments and product categories

Pizza Sales Analysis

MySQL, Excel | GitHub

- Analyzed 21K+ customer orders using SQL joins, aggregations, and business reporting queries
- Calculated revenue, demand, and product performance KPIs to support business analysis
- Identified top-performing products and peak demand periods through data-driven reporting

Achievements

- Winner – Data Analytics Hackathon, TopDataWorks:** cleaned and merged multi-source datasets across two challenge levels and delivered insight reports
- Participant – UIDAI Data Hackathon (data.gov.in):** SQL cleaning and KPI engineering on Aadhaar enrollment records

Leadership & Activities

Volunteer – Manch of Traders Event, Paradox (IIT Madras BS Fest)

- Coordinated event operations, registrations, and participant management across multiple competition rounds
- Worked with organizers and volunteers to streamline communication and resolve operational issues on the day
